
Technician (F/H)
(Billerica, USA)

Located in Europe (Loos, France), and North America (Bruker Campus, Billerica MA), ImaBiotech offers services with new imaging technologies, applications and software (Quantinetix™, Multimaging™). In order to accelerate drug development with innovative & proprietary imaging technologies, ImaBiotech offers Mass Spectrometry Imaging services to provide a cost-effective solution to preclinical and clinical studies.

As a result of positive growth, ImaBiotech offers a Laboratory Technician position in Mass Spectrometry Imaging. This position holder will contribute to the continual development of our company and obtain valuable experience by being integrated within the company's dynamic range of expertise and work ethic.

Principal Responsibilities and Duties:

- Prepare histological sections (fixed, FFPE, frozen, ect...) on many different types of ex vivo tissue samples from many different types of species.
- Prepare histological stained slides (H&E, IHC, fluorescence, ect...), as well as generate images using an appropriate microscope and HD slide scanner.
- Prepare samples for Mass Spectrometry Imaging studies, which include sample sectioning, dilution preparation, and matrix coating (if required).
- Follow instructions in accordance with the laboratory manager, project manager, study protocol, and standard operating procedures (SOP).
- Confirm and verify the quality of the biological samples upon receipt.
- Prepare the study related material (buffers, matrices, standards, ect...) and monitor the ordering of supplies.
- Maintain the operation and cleanliness of the equipment/instrumentation in the laboratory.
- Discuss progress

Qualifications:

- Bachelor degree in biology, biochemistry, or similar life science area is required.
- Previous experience in a working laboratory is beneficial.
- Attention to detail and strong organizational skills are desired.
- Able to work effectively in a fast-paced, start-up company environment within a multi-disciplinary team.
- Prior mass spectrometry experience is a plus.
- Numerical and Analytical ability
- Strong communication skills to maintain a safe and efficient laboratory.
- Fluent in spoken and written English.
- Basic computer skills, such as Microsoft office (PowerPoint, Word, and Excel).
