

Mass Spectrometry Imaging AWARD 2016

Lille, France – 6th January, 2016 – ImaBiotech launches today, for the third consecutive year, its MSI Award. This award recognizes the innovation in the field of Mass Spectrometry Imaging.

This competition is made for you if you are a student, a PhD candidate, a Post-Doc or a scientist with brilliant ideas or works using MSI in:

- Innovative applications and workflow (proteomics, metabolomics...)
- Innovative protocols and uses (data interpretation)
- Innovative improvements (instruments).

This contest is a real opportunity to get your dream off the ground.

Regulation:

Applications should consist of a published or unpublished manuscript (thesis, scientific paper, internal lab experiences) from the past two years in the domain of MSI (SIMS, MALDI, DESI, LEASI and other innovative surface techniques and softwares). Submit one page description with the benefits and innovation of your works, with a CV and 2 recommendation letters.

Participation conditions:

Award: Plaque and a monetary award of **\$5,000**. This award will be presented at the annual meeting ASMS 2016.

No age limit

Application deadline: March 25, 2016.

Questions? All related inquiries can be sent to award@imabiotech.com

Submissions: Please submit your application directly to award@imabiotech.com

About ImaBiotech

Located in Europe (France) and North America (Cambridge, MA), ImaBiotech (www.imabiotech.com) develops and offers services with new imaging technologies (Quantinetix™, Multimaging™) and applications. In order to accelerate drug development, ImaBiotech offers Mass Spectrometry Services to provide a cost effective solution to preclinical and clinical studies. This molecular technique is used for qualitative & quantitative efficacy and toxicity of drug candidates from the whole body to cell levels.
