

Histology Technician (Greater Boston Area, USA)

ImaBiotech is an international company, with different lab facilities located in Europe (North of Paris, France), and North America (Billerica, MA). The company is a CRO company and offers services with new histology imaging technologies, applications and software (Quantinetix™, Multimaging™). In order to accelerate and improve drug development, ImaBiotech provides a wide range of services to support preclinical and clinical studies in different therapeutic areas such as Oncology, Dermatology, CNS and respiratory Diseases.

As a result of positive growth, ImaBiotech offers a Technician position in Histology department. This position holder will contribute to the continual development of our company and obtain valuable experience by being integrated within the company's dynamic range of expertise and work ethic.

Principal Responsibilities and Duties:

- Confirm and verify the quality of the biological samples upon receipt.
- Prepare the study related material (buffers, matrices, standards, etc.) and monitor the ordering of supplies.
- Prepare histological sections (fixed, FFPE, frozen, etc.) on many different types of ex vivo tissue samples from many different types of species.
- Prepare histological stained slides (H&E, IHC, fluorescence, etc.), as well as generate images using an appropriate microscope and HD slide scanner.
- Prepare samples for Imaging studies, which include sample sectioning, dilution preparation, and matrix coating (if required).
- Follow instructions in accordance with the laboratory manager, project manager, study protocol, and standard operating procedures (SOP).
- Maintain the operation and cleanliness of the equipment/instrumentation in the laboratory.

Qualifications:

- Previous experience in Tissue sectioning and histology is required.
- Bachelor degree in biology or similar life science area is required.
- Attention to detail and strong organizational skills are desired.
- Able to work effectively in a fast-paced, start-up company environment within a multi-disciplinary team.
- Fluent in spoken and written English.
- Basic computer skills, such as Microsoft office (PowerPoint, Word, and Excel).
