

## Study Director / Principal Investigator (m/f) Lille, France (on site)

ImaBiotech is an international contract research organization (CRO) specialized in bioanalytical service located in USA and Europe to support pharmaceutical and biotech companies. ImaBiotech's mission is to provide the latest technologies and scientific expertise to measure all cellular responses that will elucidate drug efficacy and reveal the high potential of new therapies. In order to measure these parameters, we developed robust methods to quantify the exact amount of drug in specific targeted cells in human and animal models.

As a Study Director / Principal Investigator you are responsible for the management, the performance and the scientific quality of your projects. You provide the interpretation and report the results to our clients. You work in close contact with these clients and you are able to build a good and lasting working relationship. Together with a team of specialists you are the prime contact for our clients for technical and scientific questions with to our bioanalysis and spatial-bioanalysis services.

### Principal Responsibilities and Duties:

- Act as study director, ensuring studies are performed on time and reported to high scientific standards
- Supervising studies according to study plans and SOPs in compliance with GLP-Like environment
- Communicating and working with customers to provide technical expertise and advice to relevant study staff
- Interpreting data and preparing reports
- Developing project management skills by effectively managing activities and resources
- Reviewing and preparing SOPs along with preparing study plans

### Qualifications & Skills:

- A minimum of a BSc or equivalent in an analytical chemistry or biochemistry related discipline with a minimum of 5 years of experience in project management in a CRO company.
- Experience in an analytical laboratory, preferably in a bioanalytical department within a contract research setting.
- Excellent communication skills in order to ensure successful outcomes for the company and its partners
- A proven level of problem-solving ability and adaptability, in relation to both scientific and project management challenges.
- Ability to multi-task effectively in a fast-paced environment to meet deadlines, prioritize and balance workloads
- Strong analytical and strategic skills and proven ability to work within a global and matrix organization
- Ability to work in a team environment
- Authorized to work in France
